Tournament Setup

Creating a Tournament

Tournaments can be created by association admins and reflect the requirement of holding tournaments over e.g. a weekend instead of maintaining a league over the course of a season. Comment: tournaments are not yet included in the live view.

The tournament module allows to manually create games (full flexibility) as well as assisted game management for creating round-robin games as well as single knockout phases. This assistant requires an amount of teams that can be divided by four.

Games can always be created manually as part of the tournament setup and also at later stages, in case you want to play double knockout.

Gameday – Part 1:

Roster Setup

ATTENTION: with the update of 07 November 2022, you can add jersey numbers and officials until the game has ended. Clicking on *START GAME* still locks the rosters, but you can update the jersey no. and officials.

It is the team manager's responsibility to populate & update their team's roster. For more flexibility and convenience, team managers from *team A* can also manage the roster of *team B* and vice versa.

Select players who are participating in the game and populate the jersey number. The jersey number is required include the players in the game statistics. This applies for both live input and for post-game input.

Paper Process:

The roster can be printed without the numbers. However, jersey numbers must be added before ending the game and populating the statistics accordingly. In case players from a different team (same club) are helping out click on *Guest player* and add accordingly.

When clicking "(Roster)" you will be provided with a PDF which complies with the paper process previously known. The PDF can be used for the existing "paper processes", e.g. having a printed scoresheet (German: *Spielberichtsbogen*) and printed rosters (German: *Meldebogen*). Game results, jersey numbers can also be added post game, hence the rosters can be printed without the jersey numbers. Complete by clicking on *SAVE PLAYERS* at the bottom.
